

Step to Set up Alfresco with idempiere:-

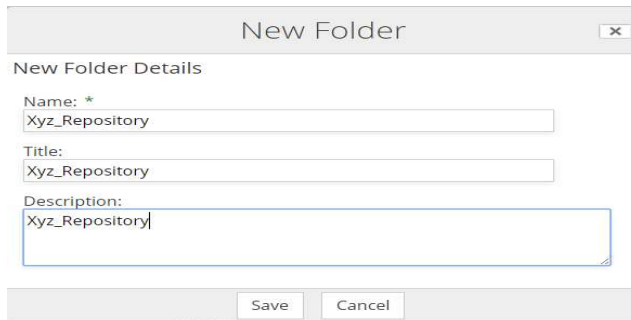

- ➔ Install alfresco-community-5.0.c-installer-win-x64
- ➔ Once Installation is done login to Alfresco
- ➔ <http://localhost:8080/share/page/>
(admin, admin is default username and password)

- ➔ Go to Repository tab and Select Create -> Folder

➔ Create New Folder

A screenshot of a 'New Folder' dialog box. The title bar says 'New Folder' with a close button. Below the title bar, it says 'New Folder Details'. There are three input fields: 'Name: *' with the value 'Xyz_Repository', 'Title:' with the value 'Xyz_Repository', and 'Description:' with the value 'Xyz_Repository'. At the bottom, there are 'Save' and 'Cancel' buttons.

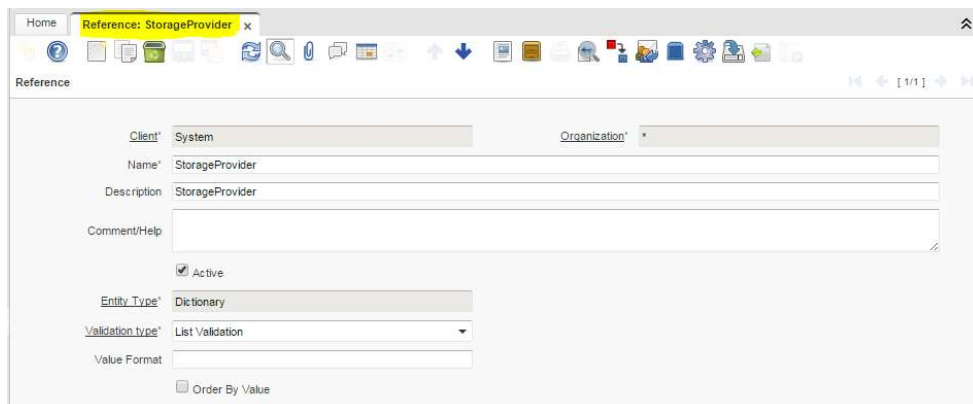

➔ Make Sure You Have Run Below 2Packs and Patch

2Pack: StorageProviderConfiguration_System

Storage_Provider_Entry_Client

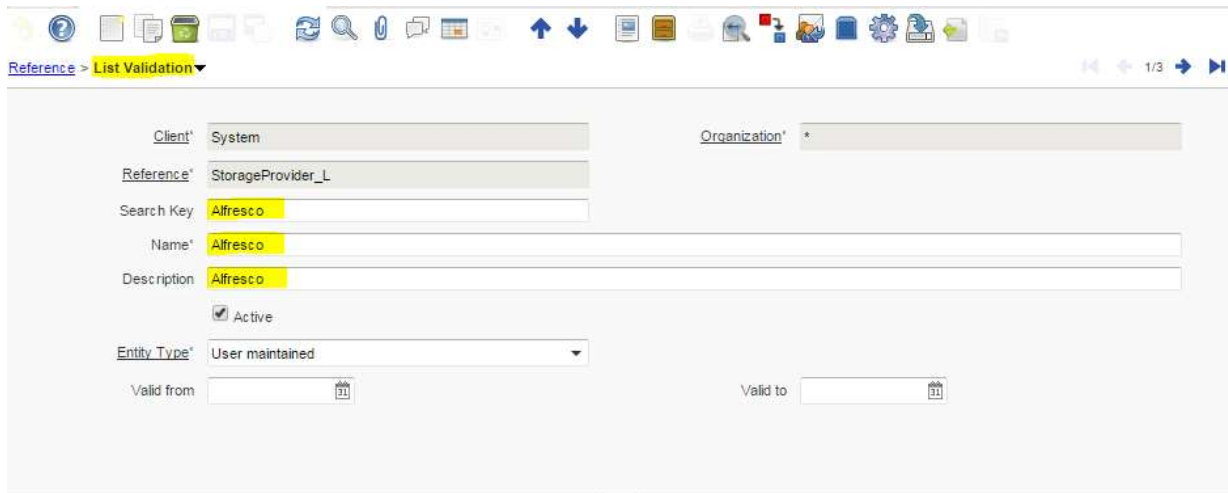

Patch: 11064-cmis_alfresco.patch

➔ Login to Idempiere as System User and Open Reference : Storage Provider

A screenshot of the Idempiere Reference form for 'StorageProvider'. The form has a title bar with 'Home' and 'Reference: StorageProvider'. Below the title bar, there is a toolbar with various icons. The form fields are: 'Client*' (System), 'Organization*' (*), 'Name*' (StorageProvider), 'Description' (StorageProvider), 'Comment/Help' (empty), 'Active' (checked), 'Entity Type*' (Dictionary), 'Validation type*' (List Validation), 'Value Format' (empty), and 'Order By Value' (unchecked).

➔ Add new Value To List Validation

Reference > List Validation

Client* System Organization* *

Reference* StorageProvider_L
